*CAUTION: Don't let the whimsical cover fool you —
this is a serious book!*

Behold a new kind of political book for the new political era — bold, uncompromising, thorough and plainspoken. Economic truths and a hard look at the sorry state of our political system combine with an insider's look at the hidden "other side" of our legal system. Here's the proof that what you don't know **can** hurt you!

Find out:

- The biggest boondoggle of the century: how corporations became "people" and why they want to stay that way
- How we came to have two parallel court systems — one visible, one invisible
- How campaign contributions created two sets of laws — one for the rich, one for the rest of us
- How money became equivalent to "freedom of speech" — and why we can't let it stay that way

Then, learn about new solutions:

- Tax reform made clear and simple
- Using term limits and career limits to curb political corruption
- Overthrowing the tyranny of corporate sovereignty
- Leveling the playing field between big corporations and the common man

The stakes for the future of America are at an all-time high. John H. Correll, a trial lawyer with decades of experience, uses his unique perspective to argue for a new algorithm for American government — one that returns us to the spirit of equality and openness championed by the Founding Fathers.
